DETAILED ACTION

Allowable Subject Matter

Claims 6-20 are allowed.

Claims 6-20 are allowable over the prior art of record for at least the reason that even though the prior art discloses optical isolators comprising two stages, each stage comprising a pair of birefringent wedges disposed on either side of a Faraday rotator, the prior art fails to disclose an optical isolator, wherein the second stage is mechanically rotated about 90° with respect to the first stage, and wherein the second stage includes a third birefringent wedge with a third optic axis rotated about 45° with respect to the optic axis of the first birefringent wedge, and the second stage also includes a fourth birefringent wedge with a fourth optic axis rotated about 45° with respect to the optic axis of the second birefringent wedge, as set forth by the claimed combination.

Chang (US 5,446,578, Fig. 15A), Emkey (EP 0653660, Fig. 1), Emkey (EP 0653661, Fig. 1) and Xie (US 2002/0135882, Fig. 4a), which is not prior art, all disclose optical isolator systems comprising two pairs of birefringent wedges, with various orientations between the two pairs.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Leo Boutsikaris whose telephone number is 571-272-2308.
